

LICENSING ANNOUNCEMENTS

January 11, 2008

AMS API Licensees,

Below are important announcements regarding a new process in the AMS API Product.

Z4DPV Process

In our continuing efforts to enhance USPS® Licensed Products, the USPS is offering a new process in the AMS API Product. This process is called Z4DPV, which allows End Users to directly access the DPV™ segment of the CASS™ process to validate an address. The Z4DPV process works in a call center type environment; however the output from the process does not meet CASS requirements.

The AMS API License Agreement has been updated to include this process. If you have any questions or concerns regarding this notice, contact the Move Update Department at 800-589-5766.

Reminders

- ◆ For any changes made to the license and supporting documents, check the Modifications document under the appropriate product name.
- ◆ Please forward your questions or concerns to ncoalink@usps.gov.
